

PRO+

GET SMART ABOUT HEALTHY BACTERIA

LifeVantage® Pro+ uses delayed-release capsules to time-release healthy bacteria deep in your gastrointestinal tract to give you the support you need. With beta-glucans added to enhance and support your journey toward a healthy gut and happier life.

Product Info

YOUR GUT COULD BE WRONG

When it comes to digestive health, sometimes your gut is wrong. Science, on the other hand, is usually spot on. And according to research, a healthy digestive system needs the right amount of beneficial bacteria to help you feel your best.

STRAIGHT TO THE GUT

LifeVantage Pro+ uses technology to deliver 6 strains of beneficial bacteria deep into your gut where they're needed. Its 6 billion CFUs of friendly bacteria are accompanied by beta-1,3/1,6-glucans from baker's yeast. This promotes a healthy balance in your microflora that you need to help support a healthy body.

Benefits

- Provides 6 billion CFUs of beneficial bacteria to help support your digestive system
- Provides beneficial bacteria to help maintain a healthy gut microflora
- Features delayed-release capsules, a unique delayed-release technology, delivering microflora throughout the day and deep into your digestive system—where they are needed most

Science

THE SCIENCE BEHIND HEALTHY BACTERIA

Maintaining the balance of good bacteria in your gut is important to maintaining good health. That's why LifeVantage chose naturally derived microflora delivered by delayed-release capsules to help give you the support you need. Combined with beta glucans, LifeVantage Pro+ uses the natural potency of microflora to help support your journey to a healthier self.

Pro+ delivers 6 billion CFUs of healthy bacteria and each strain of bacteria has a unique benefit. Bacteria are measured in colony forming units (CFU), which is a measurement of healthy bacteria. Using a broad array of strains provides you with a spectrum of benefits.

More is not always better—especially when it comes to microflora. Having a balanced amount of microflora that are healthy when they arrive in your gut is more important than the quantity you ingest. That's why LifeVantage Pro+ uses delayed-release capsules to deliver live microflora deep into your small and large intestine.

Delayed-release capsules—This delayed-release, vegetarian capsule delivers naturally derived microflora deep into your gastrointestinal tract. It survives the acidic environment in the stomach while Pro+ makes the journey through your digestive tract. This ensures that your microflora get to your small and large intestine—where they're needed most.

Beta-1,3/1,6-Glucans—This healthy yeast beta-glucan helps support general well-being year-round.

Bacterial Strains—These beneficial strains help support healthy digestion. *Lactobacillus acidophilus* La-14, *Lactobacillus paracasei* Lpc-37, *Lactobacillus acidophilus* NCFM, *Lactobacillus rhamnosus* GG-AF, *Lactobacillus rhamnosus* HN001, and *Bifidobacterium animalis subsp lactis* Bi-07.

Directions

Take 1 capsule daily with a full glass of water.
