

Stay Sharp.
Fresh eyes and
bright ideas.

Your vision, your perspective, your focus. They all start with your eyes. As we use technology more and more—for work and play—it's important to protect your eyes against blue light from all your devices. IC Bright combines carotenoids with vitamins and key ingredients that effectively support your eye health. It also helps reduce eye fatigue and strain. Feel fresh and bright, and focus on what matters.

What are you looking at?

Blue light. It's unavoidable—and the most harmful type of light in the visible spectrum. Its main source is the sun, but it also comes from all your digital devices: laptops, desktops, tablets, and TVs. On average, a person spends at least half a day on digital devices.

Whether you spend time outdoors in the sun, work in front of a computer, or want to maintain eye health as you age, IC Bright supports your efforts with targeted protection and nourishment. Plus, you get added benefits to support your cognitive or psychological functions.

Directions

Take 2 softgels daily, preferably with food.

Benefits

Supports eye health and protects eyes against oxidative stress

Useful to people who are exposed to sunlight and who regularly use digital devices emitting blue light

Contains nutrients that support visual function and performance

Contains Vitamin C that contributes to normal cognitive and affective psychological function

May help reduce eye fatigue and eye strain from use of digital devices
