

product information sheet

Stay Sharp.
Fresh eyes
and bright ideas.

Your vision, your perspective, your focus. They all start with your eyes. As we use technology more and more—for work and play—it's important to protect your eyes against blue light from all your devices. IC Bright combines macular carotenoids with vitamins and key ingredients that effectively support your eye and brain health. It also helps reduce eye fatigue and strain, supports cognitive functions, and may help support normal sleep patterns. Feel fresh and bright, and focus on what matters.

What are you looking at?

Blue light. It's unavoidable—and the most harmful type of light in the visible spectrum. Its main source is the sun, but it also comes from all your digital devices: laptops, desktops, tablets, and TVs. On average, a person spends at least half a day on digital devices.

Whether you spend time outdoors in the sun, work in front of a computer, or want to maintain eye health as you age, IC Bright supports your efforts with targeted protection and nourishment. Plus, you get added benefits to support your brain health and sleep patterns.

Directions

Take 2 softgels daily, preferably with food.

Benefits

Supports eye health and protects eyes against oxidative stress

Protects eyes from the effects of blue light from digital devices and the sun

Supports brain health and helps promote healthy levels of essential proteins for the brain

Helps increase macular pigment optical density to promote macular and retinal health

Helps reduce eye fatigue and eye strain from use of digital devices

May help support normal sleep patterns, which can be disrupted by blue light exposure
