

product information sheet

Stay Sharp.
Fresh eyes
and bright ideas.

Your vision, your perspective, your focus. They all start with your eyes. As we use technology more and more—for work and play—it's important to protect your eyes against blue light from all your devices. IC Bright combines macular carotenoids with vitamins and key ingredients that effectively support your eye health. Feel fresh and bright, and focus on what matters.

What are you looking at?

Blue light. It's unavoidable—and the most harmful type of light in the visible spectrum. Its main source is the sun, but it also comes from all your digital devices: laptops, desktops, tablets, and TVs. On average, a person spends at least half a day on digital devices.

Whether you spend time outdoors in the sun, work in front of a computer, or want to maintain eye health as you age, IC Bright supports your efforts with targeted protection and nourishment.

Directions

Take 2 softgels daily, preferably with food.

Benefits

Contributes to maintaining good health

May protect eyes from the effects of blue light from digital devices and the sun (Lutein and Zeaxanthin)

Helps support eye health in conditions associated with sunlight damage, such as cataracts and age-related macular degeneration (Lutein and Zeaxanthin)

May help to reduce the risk of developing cataracts (Lutein and Zeaxanthin)

Helps increase macular pigment optical density to promote macular and retinal health (Lutein and Zeaxanthin)

Ingredients

- Lutein-zeaxanthin sourced from marigold flowers
 - 20 mg lutein
 - 4 mg zeaxanthin
- 10 mg zinc gluconate
- 125 mg vitamin C
